FAA-S-8081-25C

PARACHUTE RIGGER

Practical Test Standards

November 2023

**FLIGHT STANDARDS SERVICE
Washington, DC 20591**

FOREWORD

FAA-S-8081-25C, Parachute Rigger Practical Test Standards is published by the FAA to establish the standards for parachute rigger practical tests. FAA inspectors and designated examiners shall conduct practical tests in compliance with these standards. Instructors and applicants should find these standards helpful in practical test preparation.

FAA-S-8081-25C supersedes FAA-S-8081-25B, Parachute Rigger Practical Test Standards, dated 2012.

Major Enhancements to Version FAA-S-8081-25C

- Introduction:
 - Updated “General Information” section
 - Updated “PTS Concept” section
 - Updated “Use of the PTS” section
 - Updated “How to Conduct the Practical Tests” section
 - Updated “Additional Ratings” section
 - Updated “Satisfactory Performance” section

J. Installation of a Single Side RSL System	42

INTRODUCTION

General Information

The FAA has developed this PTS to be used by FAA Inspectors and Designated Parachute Rigger Examiners when conducting the practical test. Instructors should use this PTS when preparing applicants for the practical test. It is important to note that parachute rigger training should not be limited solely to meeting the TASKS and Objectives in this PTS. TASKS and Objectives are simply means to determine if an applicant meets the regulatory standards for the certificate or rating sought. Applicants should be trained using the references cited in this PTS.

Information considered directive in nature is described in this PTS in terms such as “shall” and “must,” indicating the actions are mandatory. Guidance information is described in terms such as “should” and “may,” indicating the actions are desirable or permissive, but not mandatory.

This PTS is available for download, in PDF format, from www.faa.gov.

Comments regarding this publication may be emailed to acsptsinquiries@faa.gov.

PTS Concept

14 CFR part 65 specifies the subject areas in which knowledge and skill must be demonstrated by the applicant before the issuance of a Parachute Rigger Certificate with the associated type rating. This PTS is incorporated by reference in 14 CFR part 65 and imposes requirements on persons seeking an airman certificate or rating. The FAA will revise this PTS whenever it is determined that changes are needed in the interest of safety. **Adherence to the provisions of regulations and the PTS is mandatory for the evaluation of Parachute Rigger applicants.**

PTS Description

This PTS contains the Senior and Master Parachute Rigger standards.

This PTS contains seven AREAS OF OPERATION. An AREA OF OPERATION is a subject area in which the parachute rigger must have knowledge and/or demonstrate skill appropriate to the certificate and/or rating sought.

Each AREA OF OPERATION will have several TASKs listed. A TASK is the title of either a knowledge area, a skill, or a job function appropriate to that AREA OF OPERATION.

Each TASK specifies an Objective(s) of what will be accomplished and indicates the appropriate certification level that it applies to. The three types of Objectives that may appear under a TASK are:

1. “Knowledge Objective,” which exclusively consists of oral questions. Each question is an element of the Objective. This type of Objective may be recognized by the phrase “Exhibits knowledge of” in the objective description.
2. “Skill Objective,” which exclusively consists of a skill demonstration. Each step or demonstration of the Objective is an element of the Object. This type of Objective may be recognized by the use of the word “Demonstrates” in the objective description.
3. “Combined Objective,” which consists of both knowledge and skill objectives.

The TASK includes:

1. specifically what the applicant shall know or be able to do.
2. any special conditions under which the TASK is to be performed.
3. minimum acceptable standards of performance (the reference).

The examiner determines that the applicant meets the TASK Objective through the demonstration of competency in various elements of knowledge and/or skill.

NOTE is used to emphasize special considerations required in the AREA OF OPERATION or TASK.

The REFERENCE(S) contained in a TASK identifies the publication(s) that describes the TASK. Descriptions of TASKS are not included in the parachute rigger standards because this information can be found in references listed for each TASK. Publications other than those listed may be used as references if their content conveys substantially the same meaning as the referenced publications.

References listed in this practical test book include the current revisions of the following publications:

Vol.	Volume

Use of the PTS

The FAA requires that all practical tests for a parachute rigger certificate and/or rating be conducted in accordance with the appropriate PTS, the current versions of FAA Order 8900.2, General Aviation Airman Designee Handbook, FAA Order 8900.1, Flight Standards Information Management System, and FAA Order 8000.95, Designee Management Policy.

This PTS contains standards for the issuance of both Senior and Master Parachute Rigger Certificates.

When using this PTS, the examiner must evaluate the applicant's knowledge and skill in sufficient depth to determine that the objective for each selected TASK is met. The examiner must personally observe all elements of each TASK being performed by the applicant.

When planning the test, the examiner is not required to follow the precise order in which the AREAS OF OPERATION and TASKs appear in this PTS. The examiner may change the sequence or combine TASKs with similar Objectives to have an orderly and efficient flow of the practical test. If the elements in one TASK have already been evaluated in another TASK, they need not be repeated. For example: the applicant need not be evaluated in AREA OF OPERATION VI, TASK F, Sewing Machine Operation, if that TASK was sufficiently observed during the completion of AREA OF OPERATION V, TASK J, Radial Seam Construction.

Any TASK selected for evaluation during the practical test shall be evaluated in its entirety.

The applicant must satisfactorily demonstrate the objectives in the AREAS OF OPERATION appropriate to the certificate and/or rating sought.

Parachute Rigger Practical Test Prerequisites

14 CFR part 65 provides practical test and certification prerequisites.

Pursuant to 14 CFR 65.117, an applicant may forgo a practical test and receive a senior parachute rigger certificate if the applicant passes a written test on the regulations of part 65, subpart F and presents satisfactory documentary evidence that the applicant (1) is a member or civilian employee of an Armed Force of the United States, is a civilian employee of a regular armed force of a foreign country, or has, within the 12 months before the applicant applies, been honorably discharged or released from any status covered by this paragraph; (2) is serving, or has served within 12 months before the applicant applies, as a parachute rigger for such an Armed Force; and (3) has the experience required by 14 CFR 65.115.

Retesting after Failure

An applicant for a practical test for a certificate and/or rating may apply for retesting 30 days after the date the applicant failed the test. An applicant may apply for retesting before the 30 days have expired if the applicant presents a signed statement from an airman holding the certificate and rating sought by the applicant, certifying that the airman has given the applicant additional instruction in each of the subjects failed and that the airman considers the applicant ready for testing. When application is made for a retest after failure of a previous test or incomplete test, the applicant must:

- Complete two FAA Form 8610-2 (two originals) in accordance with the instructions furnished by the DPRE or FAA Inspector.
- Present the original FAA Form 8610-2 from the previous test, showing the ratings passed or failed.

NOTE: FAA Form 8610-2, block V does not need to be signed by an FAA Inspector again when the original FAA Form 8610-2 (with authorizing signature) is attached to the file.

NOTE: During a retest, any TASK may be reevaluated, including those previously passed.

Required Material for the Practical Test

The DPRE shall provide all tools, equipment, and reference materials to support the test. These materials shall include, but are not limited to, copies of 14 CFR, ADs, ACs, manufacturer's technical and parts manuals, service information, and any other instructions and/or reference materials that are necessary for the objective accomplishment of the assigned TASK(s). All reference material shall be unmarked and in good condition. The applicant's use of other reference material that the DPRE has NOT provided is prohibited. Use of nonprogrammable calculators is permitted where appropriate. Applicants may use personal tools and equipment at the discretion of the DPRE.

Examiner Responsibility

The examiner who conducts the practical test is responsible for determining that the applicant meets acceptable standards of knowledge and skill in the assigned TASKS.

Aviation English Language Standard

In accordance with the requirements of 14 CFR part 65, section 65.113 and the FAA Aviation English Language Proficiency Standard, the applicant must demonstrate the ability to read, write, speak, and understand the English language throughout the application and testing process. English language proficiency is required. Normal restatement of questions as would be done for a native English speaker is permitted and does not constitute grounds for disqualification. If a DPRE questions an applicant's ability to meet this English Language Standard, they should contact their FSO.

How to Conduct the Practical Tests

The DPRE shall conduct the test in accordance with the latest version of FAA Order 8900.2, General Aviation Airman Designee Handbook, Chapter 6, Section 4, DPRE—Conducting and Grading Tests.

In general, the DPRE will test the applicant on each AREA OF OPERATION corresponding to the requirements for the certificate and/or rating sought. In Areas of Operation where any “Required TASK(s)” are identified, the examiner must test the applicant on all required TASKs; additional TASKs may be selected at any time if deemed necessary.

Testing the Senior Applicant

The examiner must select at least the following Tasks as noted in the following Areas of Operation. Additional Task(s) may be selected as deemed helpful in evaluating the applicant.

- I. AREA OF OPERATION: Certification. Select TASK E.
- II. AREA OF OPERATION: Privileges, Limitations, and Operating Rules. Select TASK E and at least one other TASK applicable to Senior certification.
- III. AREA OF OPERATION: Packing Parachute: Select the corresponding packing TASK of each type rating requested.
- IV. AREA OF OPERATION: Parachute Operation and Care. Select at least one TASK applicable to Senior certification.
- V. AREA OF OPERATION: Parachute Construction Details. Select at least one TASK applicable to Senior certification.
- VI. AREA OF OPERATION: Parachute Repair. Select TASK A and at least one other TASK applicable to Senior certification.

Testing the Master Applicant (non-certificated, not holding a Senior Certificate)

The examiner must select at least the following Tasks as noted in the following Areas of Operation. Additional Task(s) may be selected as deemed helpful in evaluating the applicant.

- I. AREA OF OPERATION: Certification. Select TASK E and one other TASK applicable to a Master applicant.
- II. AREA OF OPERATION: Privileges, Limitations, and Operating Rules. Select TASK E and one other TASK.
- III. AREA OF OPERATION: Packing Parachutes. Select at least the two-type rating packing TASKs selected by the applicant.
- IV. AREA OF OPERATION: Parachute Operation and Care. Select at least two TASKs.
- V. AREA OF OPERATION: Parachute Construction Details. Select TASK B and at least one other TASK.
- VI. AREA OF OPERATION: Parachute Repair. Select TASK A and at least two other TASKs.
- VII. AREA OF OPERATION: Parachute Alterations. Select TASK E and at least one other TASK.

Testing the Master Applicant (certificated, holding a Senior Certificate)

The examiner must select at least the following Tasks as noted in the following Areas of Operation. Additional Task(s) may be selected as deemed helpful in evaluating the applicant.

- I. AREA OF OPERATION: Certification. Select TASK E and one other TASK applicable to a Master applicant.
- II. AREA OF OPERATION: Privileges, Limitations, and Operating Rules. Select TASK E and one other TASK applicable to a Master applicant.
- III. AREA OF OPERATION: Packing Parachutes. If the applicant currently holds two ratings and is not requesting any additional rating(s) select one of the alternate packing TASKs either E, F, or G. In addition, the examiner may require the applicant to demonstrate the packing of any type rating currently held.
- IV. AREA OF OPERATION: Parachute Operation and Care. Select at least two TASKs applicable to a Master applicant.
- V. AREA OF OPERATION: Parachute Construction Details. Select TASK B and at least one other TASK applicable to a Master applicant.
- VI. AREA OF OPERATION: Parachute Repair. Select TASK A and at least two other TASKs applicable to a Master applicant.
- VII. AREA OF OPERATION: Parachute Alterations. Select TASK E and at least one other TASK.

Additional Ratings

For an added rating to either a senior or master certificate, the applicant shall be tested from AREA OF OPERATION III on the type ratings sought. At his or her discretion, the examiner may require the applicant to demonstrate any TASK(s) appropriate to the certificate held.

An applicant for a senior parachute rigger certificate on the basis of military experience is not required to take a practical test provided the applicant meets the requirements in 14 CFR, section 65.117.

Satisfactory Performance

The practical test is passed if, in the judgment of the examiner, the applicant has satisfactorily demonstrated the objectives in the AREAS OF OPERATION applicable to the certificate and/or rating sought, per 14 CFR part 65, subpart F.

Unsatisfactory Performance

If the applicant does not meet the prescribed proficiency level on each assigned TASK in each required AREA OF OPERATION, the associated AREA OF OPERATION is failed; therefore, the practical test is failed. When it becomes obvious during the test that an applicant does not possess sufficient proficiency and is failing an AREA OF OPERATION, the examiner may discontinue testing. However, in some cases it may be advantageous to continue the test to the end. The test will be continued only with the consent of the applicant.

The applicant is entitled credit for only those AREAS OF OPERATION satisfactorily performed. However, during the retest and at the discretion of the examiner, any TASK may be reevaluated, including those previously considered satisfactory.

I. AREA OF OPERATION: CERTIFICATION

A. TASK: PARACHUTE RIGGER CERTIFICATE REQUIREMENTS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 65, section 65.111.

Objective. To determine that the applicant exhibits knowledge of the regulations with regard to who may pack, maintain, or alter any main parachute of a dual parachute by describing:

1. certificate requirements.
2. who would require supervision and the requirements of the supervisor.
3. the provisions for packing for personal usage.
4. the provisions for packing for tandem operations.

B. TASK: SENIOR PARACHUTE RIGGER CERTIFICATION REQUIREMENTS

NOTE: Applicable to Senior applicant.

REFERENCE: 14 CFR part 65, section 65.115.

Objective. To determine that the applicant exhibits knowledge of the senior parachute rigger certification requirements by describing the:

1. required number of parachutes to be packed per type.
2. required method of packing.
3. appropriate supervisors for a student rigger.
4. types of tests required.
5. subject areas of each test.

C. TASK: MASTER PARACHUTE RIGGER CERTIFICATION REQUIREMENTS

NOTE: Applicable to Master applicant.

REFERENCE: 14 CFR part 65, section 65.119.

Objective. To determine that the applicant exhibits knowledge of the master parachute rigger certification requirements by describing:

1. the number of years of experience required.
2. the required method of packing.
3. the minimum number and types of parachutes packed.
4. the appropriate supervisor for the packing instruction (non-certificated applicant).
5. when a written test is required.
6. what subject areas the written test covers.
7. what the practical test requires.

D. TASK: ADDITIONAL RATING REQUIREMENTS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 65, section 65.123.

Objective: To determine that the applicant exhibits knowledge of additional ratings requirements by describing the:

1. required number of parachutes per type to be packed.
2. required method of packing.
3. appropriate supervisor under which the applicant may receive instruction.
4. type test(s) required.

E. TASK: 14 CFR PART 105 PARACHUTE EQUIPMENT AND PACKING REQUIREMENTS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 105, section 105.43.

Objective: To determine that the applicant exhibits knowledge of Title 14 CFR part 105 with regard to the use of single-harness, dual parachute systems by describing the:

1. required configuration for this parachute system.
2. main parachute packing requirements.
3. reserve parachute packing requirements.
4. automatic activation device requirements.

II. AREA OF OPERATION: PRIVILEGES, LIMITATIONS, AND OPERATING RULES

A. TASK: SENIOR PARACHUTE RIGGER CERTIFICATE PRIVILEGES AND LIMITATIONS

NOTE: Applicable to Senior applicant.

REFERENCE: 14 CFR part 65.

Objective. To determine that the applicant exhibits knowledge of Senior Parachute Rigger Certificate privileges and limitations by describing:

1. which parachute types may be packed.
2. which parachute types may be maintained.
3. what repairs may be accomplished.
4. whom the senior rigger may supervise.
5. what the supervised person may accomplish.

B. TASK: MASTER PARACHUTE RIGGER CERTIFICATE PRIVILEGES AND LIMITATIONS

NOTE: Applicable to Master applicant.

REFERENCE: 14 CFR part 65.

Objective. To determine that the applicant exhibits knowledge of Master Parachute Rigger Certificate privileges and limitations by describing:

1. which parachute types may be packed.
2. which parachute types may be maintained.
3. what repairs may be accomplished.
4. whom the master rigger may supervise.
5. what the supervised person may accomplish.

C. TASK: REQUIRED FACILITIES AND EQUIPMENT

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 65.

Objective. To determine that the applicant exhibits knowledge of required facilities and equipment by listing the:

1. packing table requirements.
2. packing environment requirements.
3. tool and equipment requirements.
4. housing requirements.

D. TASK: PERFORMANCE STANDARDS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 65.

Objective. To determine that the applicant exhibits knowledge of the required performance standards of 14 CFR part 65, section 65.129 by describing what the regulation states concerning the certificated parachute rigger with regard to:

1. requirements for type rating.
2. unsafe parachutes.
3. drying and airing requirement.
4. alteration of parachutes.
5. requirements to exercise privileges.

E. TASK: RECORDATION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: 14 CFR part 65.

Objective. To determine that the applicant demonstrates knowledge of recordation by creating a sample record of a:

1. packing record.
2. maintenance record.

F. TASK: MANUFACTURER'S PACKING INSTRUCTIONS

NOTE: Applicable to Senior or Master applicant.

NOTE: This TASK may be demonstrated simultaneously with any packing TASK from AREA OF OPERATION III.

REFERENCES: Parachute Manufacturer's Instructions; 14 CFR part 65.

Objective. To determine that the applicant demonstrates use of manufacturer's packing instructions by:

1. layout and inspection.
2. folding canopy and stowing lines.
3. closure of pack flaps and routing of ripcord.
4. sealing pack.

G. TASK: REPAIR CLASSIFICATIONS

NOTE: Applicable to Senior or Master applicant.

REFERENCES: 14 CFR part 1; AC 105-2.

Objective. To determine that the applicant exhibits knowledge of repair classifications by describing:

1. what constitutes a major repair.
2. three examples of major repairs.
3. who may perform major repairs.
4. what data is used to make a repair.

H. TASK: ALTERATIONS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: AC 105-2.

Objective. To determine that the applicant exhibits knowledge of alterations by describing:

1. what constitutes a parachute alteration.
2. certificate requirements for a rigger to perform alterations.
3. what data is required.
4. how alteration approval may be obtained.
5. who may perform alterations.

I. TASK: TSO-C23 REQUIREMENTS

NOTE: Applicable to Senior or Master applicant.

REFERENCES: TSO-C23; Aerospace Standard 8015A.

Objective. To determine that the applicant exhibits knowledge of TSO-C23 requirements by listing the:

1. seven major components of the complete parachute assembly.
2. required marking and location of marking on stowage container.
3. required marking and location of marking on canopy.
4. required marking on primary actuation device/ripcord.

III. AREA OF OPERATION: PACKING PARACHUTES

NOTE: Examiner must select the corresponding packing TASK for each type rating sought.

A. TASK: PACKING SEAT TYPE PARACHUTE (SEAT TYPE RATING)

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a seat type parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. closure of diaper, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

B. TASK: PACKING BACK TYPE PARACHUTE, EXCLUDING PIGGYBACK (BACK TYPE RATING)

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a back type parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. installation of deployment bag or diaper, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

C. TASK: PACKING CHEST TYPE PARACHUTE (CHEST TYPE RATING)

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a chest type parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.

3. folding the canopy.
4. closure of diaper, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack and making all required record entries.

D. TASK: PACKING LAP TYPE PARACHUTE (LAP TYPE RATING)

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a lap type parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. closure of diaper, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

E. TASK: PACKING ROUND PARACHUTE

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a round parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. closure of diaper, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

F. TASK: PACKING RAM-AIR PARACHUTE

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a ram-air parachute in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. installation of deployment bag or diaper closure, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

G. TASK: PACKING PIGGYBACK CONTAINER TYPE PARACHUTE

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Manufacturer's Instructions.

Objective. To determine that the applicant demonstrates the procedure for packing a piggyback container type parachute assembly in accordance with the manufacturer's instructions by:

1. inspecting the complete assembly.
2. flaking the canopy.
3. folding the canopy.
4. installation of deployment bag or diaper closure, if applicable.
5. canopy and line stowage (sequence dependent on model).
6. placement of pilot chute.
7. closing the container.
8. sealing the pack.
9. making all required record entries.

IV. AREA OF OPERATION: PARACHUTE OPERATION AND CARE

A. TASK: PARACHUTE STORAGE

NOTE: Applicable to Senior or Master applicant.

REFERENCES: 14 CFR part 65; AC 105-2; PPM.

Objective. To determine that the applicant demonstrates preparing a parachute for extended storage by:

1. unpacking the parachute.
2. roll packing the canopy.
3. positioning slider if installed.
4. daisy chaining lines.
5. removing rubber bands from assembly.
6. separating canopy assembly from container, if necessary.
7. placing assembly in storage carton (canopy on the bottom, lines, pack, and harness on top).

B. TASK: PARACHUTE DRYING AND AIRING

NOTE: Applicable to Senior or Master applicant.

REFERENCES: 14 CFR part 65; PPM Vol. II.

Objective. To determine that the applicant:

1. exhibits knowledge of procedure for drying and airing parachute assemblies by describing—
 - a. recommended airing time.
 - b. method and conditions when airing time may be reduced.
 - c. recommended atmospheric conditions in the packing area.
2. demonstrates hanging a round canopy and chaining the suspension lines.
3. demonstrates hanging a ram-air canopy.

C. TASK: PARACHUTE ASSEMBLY INSPECTION

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol.; Canopy Manufacturer's Manual; Container Manufacturer's Manual.

Objective. To determine that the applicant:

1. demonstrates parachute assembly inspection by—
 - a. layout and straightening of the complete canopy, container, and harness assembly.
 - b. ensuring all components are compatible, complete, and free from manufacturer's errors and in compliance with approved changes.

2. demonstrates inspection of the following components—
 - a. pilot chute.
 - b. pilot chute bridle.
 - c. deployment device (bag, diaper, etc.).
 - d. lines (suspension-steering).
 - e. risers and links.
 - f. harness.
 - g. container.
 - h. ripcord.
 - i. ram-air canopy.

D. TASK: CLEANING PARACHUTE CANOPIES

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant:

1. exhibits knowledge of cleaning parachute canopies by describing—
 - a. which canopies could be washed if absolutely necessary.
 - b. the effect washing would have on the permeability of aram-air canopy.
 - c. how hard water may be softened.
 - d. the washing process (including the handling of the canopy during the wash).
 - e. how the canopy should be dried and the maximum temperature and time a heated drying room may be used.
2. demonstrates spot cleaning a sample piece of nylon canopy material soiled with grease.

E. TASK: PARACHUTE HARNESS ADJUSTMENT

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant demonstrates parachute harness adjustment by:

1. selecting the correct size harness.
2. loosening adjustable back, chest, and leg straps.
3. donning harness and positioning pack over shoulders.
4. positioning and tightening leg straps.
5. adjusting main lift webs, if adjustable.
6. tightening diagonal back straps or horizontal adjustments, if adjustable.
7. adjusting chest strap.
8. threading and tightening belly band, if installed.
9. stowing excess webbing.

F. TASK: REQUIREMENT OF THE ASSIST DEVICE IN A PILOT CHUTE STATIC LINE

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. I, Chapter 7; 14 CFR part 105, section 105.47.

Objective. To determine that the applicant:

1. exhibits knowledge by describing the Federal Aviation Regulations requirements concerning—
 - a. when an assist device will be employed.
 - b. the length of the assist device.
 - c. the static load strength of the assist device.
 - d. who may attach an assist device to a main parachute.
2. exhibits knowledge of pilot chute deployment by pin type static line employing an assist device, by describing the sequence of events in the deployment cycle.
3. demonstrates inspection of a pin type static line with attached assist device.

G. TASK: REQUIREMENT OF THE ASSIST DEVICE IN A DIRECT DEPLOYMENT STATIC LINE

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. I, Chapter 7; 14 CFR part 105, section 105.47.

Objective. To determine that the applicant:

1. exhibits knowledge by describing the 14 CFR requirements concerning—
 - a. when an assist device will be employed.
 - b. the length of the assist device.
 - c. the static load strength of the assist device.
 - d. who may attach an assist device to a main parachute.
2. exhibits knowledge of direct deployment of main parachute canopy by break cord static line, by describing the sequence of events in the deployment cycle.
3. demonstrates inspection of a break cord static line with attached assist device.

H. TASK: CLEANING PARACHUTE HARNESS/CONTAINER

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant:

1. exhibits knowledge of cleaning parachute harness/container assemble by describing—
 - a. how the harness/container may be cleaned.
 - b. how Velcro should be protected during washing.
 - c. the effects of washing the harness webbing in overly hot water or overly strong soap solution.
 - d. how the hardware should be protected after cleaning.
 - e. the effects of cleaning solvents on nylon and Lexan plastic.
2. demonstrates litmus testing of an area of suspected acid contamination on a sample piece of container material.

V. AREA OF OPERATION: PARACHUTE CONSTRUCTION DETAILS

A. TASK: SEAM CONSTRUCTION DEFECTS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I or Vol. II.

Objective. To determine that the applicant demonstrates identification of various seam construction defects from examples of the following:

1. a correctly sewn seam
2. a raw edge defect
3. excess material beyond desired seam width
4. under fold condition (insufficient material inside seam width)
5. over fold condition (excess material inside seam width)

B. TASK: WEBBING JOINT CONSTRUCTION

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant:

1. exhibits knowledge of webbing joint construction by describing—
 - a. which yarns of the webbing material provide the load bearing capacity.
 - b. which stitch patterns provide the greatest strength in webbing.
 - c. the number of stitches per inch commonly used on webbing and the minimum edge distance.
 - d. why stitching on webbing should extend 1 stitch over the end of the webbing material.
2. demonstrates constructing a sewn sample harness chest strap joint, using 3-point W W stitching on Type 8 webbing.
3. demonstrates constructing a sewn sample harness hip junction, using 4-point W W stitching on Type 7 webbing.

C. TASK: PARACHUTE CONSTRUCTION KNOTS

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates forming the following types of parachute construction knots:

1. clove hitch.
2. lark's head.
3. two overhand.
4. bowline.
5. surgeon's, with locking tie.

D. TASK: FABRIC CONSTRUCTION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates fabric construction details, by indicating on a sample of parachute cloth the:

1. fabric warp yarn.
2. fabric fill yarn.
3. selvage edge.
4. rip stop weave.

E. TASK: FRENCH FELL SEAM CONSTRUCTION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates construction of 301 LSc-2 French fell seam by:

1. selecting the correct sewing machine.
2. setting up the sewing machine to sew with E size A-A-59826 thread on MIL-C-4438 cloth at the correct number of stitches per inch.
3. constructing a bias 1-foot sample of a French fell seam on MIL-C-4438 cloth.
4. examining the sewn sample for any irregularities.

F. TASK: TSO-C23c

NOTE: Applicable to Senior or Master applicant.

REFERENCES: TSO-C23c; Aerospace Standard 8015A.

Objective. To determine that the applicant exhibits knowledge of technical standard order requirements by listing:

1. types of parachutes specified.
2. categories of parachutes specified.
3. seven major components of a parachute assembly.
4. primary actuation device test load and functional requirements.
5. marking requirements for stowage container, canopy, and primary actuation device.
6. strength test requirements for a category B parachute assembly.

G. TASK: TSO-C23b

NOTE: Applicable to Senior or Master applicant.

REFERENCES: TSO-C23b; NAS-804.

Objective. To determine that the applicant exhibits knowledge of technical standard order requirements by listing:

1. types of parachutes specified.
2. fitting material requirements.
3. maximum pull force required to open pack.
4. required information marking on pack.
5. required information marking on canopy.
6. ripcord tension test requirements.
7. requirement for inspection data pocket.
8. strength test requirement for a low speed parachute drop at 125 mph.

H. TASK: FASTENER TAPES

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant exhibits knowledge of fastener tapes (hook and loop) and factors that affects their functions by describing the:

1. position at installation of the two sides.
2. one-way hook tape.
3. effect of cutting the tape lengthwise.
4. effect of temperature on tapes.
5. effect of water on tapes.

I. TASK: FINGER TRAP LOOP CONSTRUCTION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that applicant:

1. exhibits knowledge of finger trap construction by describing—
 - a. the tools necessary to form loop.
 - b. the method of tensioning and marking cord.
 - c. types of stitching used to secure the loop.
 - d. the method of trimming the cord end.
 - e. the length of stitching necessary to secure the loop.
 - f. construction irregularities to be avoided.
2. demonstrates constructing a 1-inch finger trap loop in a coreless Dacron cord sample.

J. TASK: RADIAL SEAM CONSTRUCTION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates construction of an LSc-4 radial seam by:

1. setting up a sewing machine to sew with E size MIL-C-7020 cloth at the correct number of stitches per inch.
2. constructing a bias 1-foot sample of a 301-LSc-4 radial seam enclosing a section of suspension line.
3. examining the sewn sample for any seam defects.

K. TASK: FABRICATE BINDING CORNERS

NOTE: Applicable to Senior or Master Rigger applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates fabrication of 90 degree binding corners by:

1. cutting binding tape for the corner, folding and sewing a simple bound corner.
2. constructing an example of a binding finishing corner on a panel.

L. TASK: THREADING FRICTION ADAPTER

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates threading friction adapters by:

1. selecting compatible webbing.
2. threading an adapter.
3. preparing the terminal either by the split, wrap and sew method or by folding over and sewing.

VI. AREA OF OPERATION: PARACHUTE REPAIR

A. TASK: SINGLE PATCH (BASIC PATCH) CANOPY REPAIR

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. I or II; FAA-H-8083-17.

Objective. To determine that the applicant demonstrates constructing a single patch canopy repair by:

1. laying out and marking the damage area.
2. selecting proper material.
3. orientating patch material warp and filler threads to the canopy.
4. cutting and folding the patch.
5. sewing inside seam.
6. removing damaged area.
7. sewing outside seam.
8. thoroughly inspecting and ensuring the stitching has not captured a line or adjacent material.

B. TASK: REPLACEMENT OF NONCONTINUOUS CONTROL LINE (RAM-AIR CANOPY)

NOTE: Applicable to Master applicant.

REFERENCE: FAA-H-8083-17.

Objective. To determine that the applicant demonstrates replacement of noncontinuous control line on a ram-air canopy by:

1. measuring existing lines, record original dimensions.
2. cutting new line for the upper steering lines.
3. fabricating the new uppers by finger trapping and sewing.
4. fabricating the lower steering line, finger trapping the brake setloop.
5. fabricating the tog line and finger trapping to the steering line.
6. attaching the new lower control line assembly to the upper steering lines.
7. attaching the steering lines to the canopy.
8. applying tension to the complete control line assembly ensuring correct dimensions
9. sewing and trimming all finger trappings.
10. positioning (route line thru guide ring) and tying toggle.
11. check finished dimension against original dimensions.

C. TASK: APPLICATION OF NON-DESTRUCTIVE TEST METHOD TS-108

NOTE: Applicable to Senior or Master applicant.

REFERENCE: Parachute Industry Association Publications TS-108.

Objective. To determine that the applicant:

1. exhibits knowledge of the following by describing the—
 - a. purpose of the test.
 - b. tools and materials required.
 - c. test procedure.
 - d. chemical indications.
2. demonstrates the test procedure.

D. TASK: LINE ATTACHMENT LOOP REPLACEMENT

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant:

1. demonstrates preparation for suspension line attachment loop replacement on a ram-air canopy by selecting the—
 - a. required repair materials.
 - b. appropriate sewing machine.
 - c. required tools.
2. demonstrates replacing a suspension line loop.

E. TASK: REMOVAL AND INSTALLATION OF GROMMETS

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant demonstrates removal and installation of grommets by:

1. cutting the rolled barrel of the old grommet, then separating the barrel and washer from the material.
2. stitching the perimeter of the hole, for reinforcement.
3. installing new grommet tight enough that it cannot be rotated in the material by hand and with no rough edges.

F. TASK: SEWING MACHINE OPERATION

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. I; Sewing Machine Manual.

Objective. To determine that the applicant demonstrates sewing machine operation by:

1. threading the machine.
2. setting the tension.
3. adjusting the number of stitches per inch.
4. stitching a canopy seam.

G. TASK: CASCADE LINE REPLACEMENT

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant:

1. demonstrates preparation for replacement of a cascade line by selecting—
 - a. repair materials.
 - b. adjusting sewing machine.
 - c. equipment (tools).
2. demonstrates procedure for replacing a cascade line.

H. TASK: NICOPRESS SLEEVE INSTALLATION

NOTE: Applicable to Senior or Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates Nicopress sleeve installation by:

1. selecting proper size fitting.
2. cutting the cable.
3. gauging the sleeve after pressing.

I. TASK: REPLACEMENT OF V-TAB (BUTTERFLY TAB)

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates replacement of V-tab (butterfly tab) by:

1. removing only those stitches required.
2. fabricating a new V-tab.
3. positioning and tacking new tab in place.
4. applying straight stitching to appropriate area.
5. applying zigzag stitching to appropriate area.
6. repositioning suspension line in V-tab and applying final stitching.

J. TASK: REPLACEMENT OF CONTINUOUS SUSPENSION LINE

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates replacement of continuous suspension line by:

1. stitch removal.
2. pre-stretching the replacement line.
3. measurement of the replacement line.
4. installing the new line into the canopy.
5. positioning of lines in their respective links, including knotting and sewing.

K. TASK: SUSPENSION LINE REPLACEMENT IN RAM-AIR CANOPY

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant demonstrates suspension line replacement in a ram-air canopy by:

1. removing damaged line.
2. measuring the replacement line.
3. positioning of lines in respective links, including knotting and sewing.
4. positioning of the main line to the canopy.
5. installing cascade line.
6. rechecking all measurements.
7. bar tacking all open line ends.
8. inspecting work.

L. TASK: CONTAINER REPAIR

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17, Parachute Rigger Handbook.

Objective. To determine that the applicant:

1. demonstrates preparation for container repair by selecting—
 - a. repair material.
 - b. adjusting the sewing machine.
 - c. required tools.
2. demonstrates the procedure for container repair.

M. TASK: RAM-AIR CANOPY REPAIR LIMITATIONS

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant demonstrates knowledge of ram-air canopy repair limitations for both certificated and non- certificated canopies, by listing limits for the following repairs:

1. re-stitching.
2. single outside patch.
3. basic patch.
4. panel patch.
5. suspension lines.

N. TASK: RAM-AIR CANOPY PATCH REPAIR ADJACENT TO A SEAM

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant demonstrates fabrication of a patch on a ram-air canopy in an area that requires the opening of a seam to accept the patch material. The applicant:

1. indicates the personnel certification requirements for this repair to both a certificated and non-certificated canopy.
2. selects materials for the repair (fabric and thread).
3. selects sewing machine.
4. selects other required tools.
5. lays out canopy and removes stitching.
6. lays out patch and pins.
7. sews patch and seam.
8. inspects work.

O. TASK: CHEST STRAP REPLACEMENT

NOTE: Applicable to Master applicant.

REFERENCE: FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace the harness chest strap by:

1. removal of any obstructing periphery blocking access to the chest strap/main lift web.
2. removal of the harness stitching and old chest strap webbing.
3. cleaning of the junction area.
4. marking of original stitch pattern.
5. determine new material requirements.
6. sew any edging if required by the original patten.
7. place new strap (glue as required) and using a harness machine sew into the junction.
8. thread thru or place any hardware as required on strap then sew stop end.
9. reinstall any periphery that was removed to facilitate the repair (i.e., back pad, ripcord housing, etc.)
10. Inspect repair.

P. TASK: CONTAINER INTERNAL (HIDDEN) PANEL REPAIR.

NOTE: Applicable to Senior or Master applicant.

REFERENCE: FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to repair tears or punctures to container panels by:

1. removal of obstructing parts or assemblies.
2. inspection of damage.
3. temporarily closing the damaged area from the outer surface with adhesive tape.
4. placing repair material (Ty-3 type) over damaged area.
5. sewing (single stitch) patch to panel.
6. sewing (zigzag) exposed damage area to patch.
7. inspect repair.

Q. TASK: MAIN CONTAINER SIDE FLAP REPLACEMENT

NOTE: Applicable to Senior or Master applicant.

REFERENCE: FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace a main container side flap by:

1. readying container for repair by removing all obstructing periphery.
2. opening the seam joining the flap to the main body of the container, and removing the damaged flap.
3. position new flap in container and sew in place. Ensuring that the replacement sewing duplicates the opposite side, and closes any seams opened in adjacent components.
4. reinstall binding tape (either new or used), ensuring that tape is properly overstitched for reinforcement.
5. closing the BOC as per the original and reinforce as required.
6. inspect repair.

R. TASK: BOC POCKET REPLACEMENT

NOTE: Applicable to Senior or Master applicant.

REFERENCE: FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace a BOC pocket by:

1. readying container for repair, may require complete unpacking of container.
2. marking corner positions of the original installation.
3. open the lower right corner of the main container and remove old BOC pocket.
4. position the new pocket in place temporarily with pins.
5. sew in place with single needle machine, backstitching corners for reinforcement.
6. re-stitch the corner of the main container as per original configuration.
7. inspect repair, ensuring correct pocket orientation.

S. TASK: ROUND CANOPY PANEL REPLACEMENT.

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. I, Chapter VII; FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace a full panel in a round canopy by:

1. pinning canopy repair area inside out on pin board.
2. cutting appropriate amount and type of replacement fabric, ensuring correct weave pattern.
3. trimming and aligning the weave, and pinning in place.
4. sewing one row of stitches around the outside of the new panel, ensuring the line is not captured in the radial seam.
5. cutting away the damaged panel.
6. trimming and pinning the raw edges.
7. sewing an inner row of stitches in the same manner as the outer row.
8. inspecting repair.

T. TASK: SQUARE CANOPY PARTIAL PANEL REPLACEMENT

NOTE: Applicable to Master applicant.

REFERENCE: FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace a partial panel in a square canopy by:

1. marking damaged area, and unpicking appropriate seams.
2. laying out and pinning canopy.
3. cutting appropriate amount and type of replacement fabric, ensuring correct weave pattern.
4. correctly positioning the new fabric over the damage area allowing enough margin to form half a French fell seam, checking the tensioning of the two panels, and pinning in place.
5. sewing the outside of the new panel.
6. reversing and removing the damaged panel, and forming the French fell seam at the raw edge, and sewing it closed.
7. sewing in any reinforcing tape.
8. repairing any damaged ribs.
9. re-stitching seams that were opened to gain access, ensuring to overstitch a minimum of 2 inches on each end.
10. reinstalling any line tabs that may have been removed, ensuring it is not twisted.
11. inspecting repair.

U. TASK: HARNESS REPAIR (Examiner designated repair.)

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant:

1. demonstrates preparation for harness repair by selecting—
 - a. repair material.
 - b. adjusting the sewing machine.
 - c. required tools.
2. demonstrates the procedure for harness repair.

V. TASK: CANOPY REPAIR

NOTE: Applicable to Senior or Mater applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant:

1. demonstrates preparation for canopy repair by selecting—
 - a. repair material.
 - b. adjusting the sewing machine.
 - c. required tools.
2. demonstrates the procedure for canopy repair.

W. TASK: LINE REPAIR (Examiner designated repair.)

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective. To determine that the applicant:

1. demonstrates preparation for line repair by selecting—
 - a. repair material.
 - b. adjusting the sewing machine.
 - c. required tools.
2. demonstrates the procedure for line repair.

X. TASK: LOWER LEG STRAP SHORTING

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to shorten lower leg straps by:

1. disassembling webbing hardware and removal of stitching in the rolled end.
2. measuring and trimming straps to new length.
3. reassembling hardware, folding webbing to the appropriate configuration for the installed hardware.
4. sewing rolled stop end on harness machine.
5. inspecting repair (check stitching, insure no twist in strap and rolled end faces outward).

Y. TASK: STANDARD HARNESS MAIN LIFT WEB REPLACEMENT

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace harness main lift web (original harness as pattern)by:

1. removing all obstructing periphery that may interfere with work.
2. disassembling strap junctions, cleaning of old thread and glue.
3. measuring and cutting of new webbing.
4. beginning at the riser end, configuring the web, duplicating original pattern.
5. reattaching and reinstalling any attachments and hardware initially removed.
6. inspecting completed repair against opposite side original web ($\pm .25"$ tolerance).
7. making an example packing data card and rigger logbook entries.

Z. TASK: MAIN RISER 3-RING LOCKING LOOP REPLACEMENT

NOTE: Applicable to Senior or Master applicant.

REFERENCES: PPM Vol. II, FAA-H-8083-17.

Objective: To determine that the applicant demonstrates skill necessary to replace the locking loop on the main riser 3-ring release by:

1. disassembling of the old locking loop and removal of the confluence wrap.
2. cutting a new loop.
3. marking and positioning the new loop.
4. sewing the new loop on the riser.
5. trimming excess material from loop and reinstalling the confluence wrap.
6. inspect repair and making an example packing data card and rigger logbook entries.

VII. AREA OF OPERATION: PARACHUTE ALTERATIONS

A. TASK: ALTERATION DATA APPROVAL

NOTE: Applicable to applicant.

REFERENCE: AC 105-2.

Objective. To determine that the applicant demonstrates alteration procedures by:

1. listing those sources in which previously approved data can be found.
2. explaining the procedure for obtaining data approval in cases in which no previously approved data exist.
3. making a sample recordation of a completed alteration.

B. TASK: INSTALL AN AUTOMATIC ACTIVATION DEVICE (CONTAINER NOT FACTORY READY)

NOTE: Applicable to Master applicant.

REFERENCE: Manufacturer's Data.

Objective. To determine that the applicant can demonstrate altering a parachute container to accept an automatic activation device by:

1. ensuring approved data is available.
2. assembling necessary materials and equipment.
3. performing layout of material.
4. cutting material to size and shape.
5. performing sewing operations.
6. installing grommets.
7. installing AAD.
8. function test AAD, if required, making appropriate record entices.

C. TASK: ALTERING RISER CONNECTORS

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant demonstrates altering riser "L" links to rapid links by:

1. ensuring approved data is available.
2. selecting replacement link.
3. inspecting new link.
4. removing stitches that parallel the "L" link across the top of the riser.
5. folding in the corners of the riser.
6. orientating the rapide link to the proper operating position.
7. hand tacking riser web.
8. torque the rapide link.

D. TASK: BRIDLE CORD ALTERATION

NOTE: Applicable to Master applicant.

REFERENCE: PPM.

Objective. To determine that the applicant exhibits knowledge of bridle cord alteration by describing:

1. approve data acquisition.
2. function of bridle cord.
3. possible effects of change in length.
4. data required to alter.
5. attachment methods (including tacking).
6. strength requirements.

E. TASK: D- or V-RING INSTALLATION

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. I.

Objective. To determine that the applicant demonstrates D- or V-ring installation by:

1. ensuring approved data is available.
2. selecting compatible snap and ring.
3. selecting appropriate webbing.
4. determining proper number of stitches per inch.
5. determining stitch pattern.
6. sewing an example installation.

F. TASK: CONVERSION OF RIPCORD DEPLOYMENT TO HAND-DEPLOYED PILOT CHUTE

NOTE: Applicable to Master applicant.

REFERENCE: PPM Vol. II.

Objective. To determine that the applicant exhibits knowledge of conversion of ripcord deployment to hand deployed pilot chute by describing:

1. ensuring approved data is available.
2. removal of ripcord pocket and housing.
3. removal of pilot chute.
4. selection of replacement bridle cord.
5. installation of Velcro.
6. installation of curved locking pin to bridle.
7. installation of pilot chute pouch and pilot chute.
8. recordation.

G. TASK: FABRICATE A CANOPY DEPLOYMENT BAG

NOTE: Applicable to Master applicant.

REFERENCE: Manufacturer's Manual.

Objective. To determine that the applicant can fabricate a canopy deployment bag by:

1. ensuring approved data is available.
2. selecting proper data (for the subject container).
3. assembling the necessary materials and equipment.
4. laying out the materials.
5. cutting to size and shape.
6. installing grommet(s).
7. performing sewing operations.

H. TASK: CONVERT THROW-OUT PILOT CHUTE FROM REAR-OF LEG POSITION TO BOC POSITION

NOTE: Applicable to Master applicant.

REFERENCE: Manufacturer's Data.

Objective. To determine that the applicant demonstrates performing all operations as required by the manufacturer's data to relocate a throw-out pilot chute pouch. Moving it from a leg-mounted position to a BOC position by:

1. ensuring approved data is available.
2. removal of leg-mounted pouch and harness bridle Velcro.
3. layout of material for new pilot chute pouch.
4. sewing operations for construction of new pouch.
5. sewing operations for attachment of new pouch to container.
6. fabrication and attachment of new pilot chute bridle including Velcro attachments as required.
7. recordation.

I. TASK: CONVERT MAIN SUSPENSION LINES OF A SQUARE CANOPY

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective: To determine that the applicant demonstrates all operations required to convert main suspension lines from Dacron to Spectra material by:

1. ensuring approved data is available.
2. laying out and straightening canopy, tensioning lines.
3. systemically removing lines.
4. cutting and pre-stretching new material.
5. finger-trapping new connector link loop.
6. running new line through slider to canopy connection, assuring symmetry with the rest of the canopy skirt, secure by re-creating original knot.
7. tensioning lines using adjacent lines as reference.
8. locating and marking entry point for the cascade line.
9. finger-trapping new cascade into main line and sewing.

10. tensioning lines and securing the cascade to the canopy by re-creating original knot.
11. finger trapping the running end and sewing.
12. repeating the processes on the remaining line groups (as require by the examiner).
13. inspecting alteration.
14. making a sample recordation of a completed alteration.

J. TASK: INSTALLATION OF A SINGLE SIDE RSL SYSTEM

NOTE: Applicable to Master applicant.

REFERENCES: PPM Vol. II; FAA-H-8083-17.

Objective: To determine that the applicant demonstrates all operations required to install a single side reserve static line system by:

1. ensuring approved data is available.
2. installing riser attachment ring.
3. modifying the ripcord housing to except lanyard ring.
4. installing ripcord guide rings and lanyard stows in container.
5. fabricating lanyard.
6. ensuring that the cutaway release cables are of the proper length to allow proper sequencing of the riser release at cut away.
