

Update to Instructor Test

Instructor Pilot/CFI Test Prep 2022

September 2023

ASA-TP-CFI-23

With the following changes, ASA's *Instructor Pilot/CFI Test Prep 2023* will prepare you for the Fundamentals of Instructing (FOI), Flight Instructor (CFI), Ground Instructor (BGI, AGI), and Sport Instructor FAA Knowledge Exams. These tests continue to reference the *Airman Knowledge Testing Supplement for Flight Instructor, Ground Instructor, and Sport Pilot Instructor (FAA-CT-8080-5H)*.

About the Test Changes

The FAA exams are “closed tests,” which means the database of questions used on the exam is not available to the public. However, the FAA identifies subjects that have been removed or added to a test, as well as pertinent information to ensure training and testing remain correlated, which, in turn, promotes a reliable certification system.

The questions and answer choices in this book provide a comprehensive representation of FAA questions, derived from history and experience with the airman testing process. You might see similar, though not exactly the same, questions on your official FAA exam. On the test, answer choices may be rearranged from the A, B, C order you see in this book. Therefore, be careful to fully understand the intent of each question and corresponding answer while studying, rather than memorize the A, B, C answer. While you may be asked a question that has unfamiliar wording, studying and understanding the information in this book and the associated reference documents will give you the tools to answer all types of questions with confidence.

We invite your feedback. After you take your official FAA exam, let us know how you did. Were you prepared? Did the ASA products meet your needs and exceed your expectations? We want to continue to improve these products to ensure applicants are prepared and become safe remote pilots. Send feedback to: cfi@asa2fly.com

Page Number	Question Number	Correct Answer	Explanation
Throughout			References AC 00-6 and AC 00-45 are changed to FAA-H-8083-28.
5-9	6183	A	<p>Answer stem A and the explanation are revised to read:</p> <p>A—Deposition</p> <p><i>Deposition is the process in which ice forms on a surface directly from water vapor on a cold, clear night. The water does not become a liquid as it passes from water vapor to ice.</i></p>

7-3 Chapter text **Figure 7-1 is revised as shown below:**

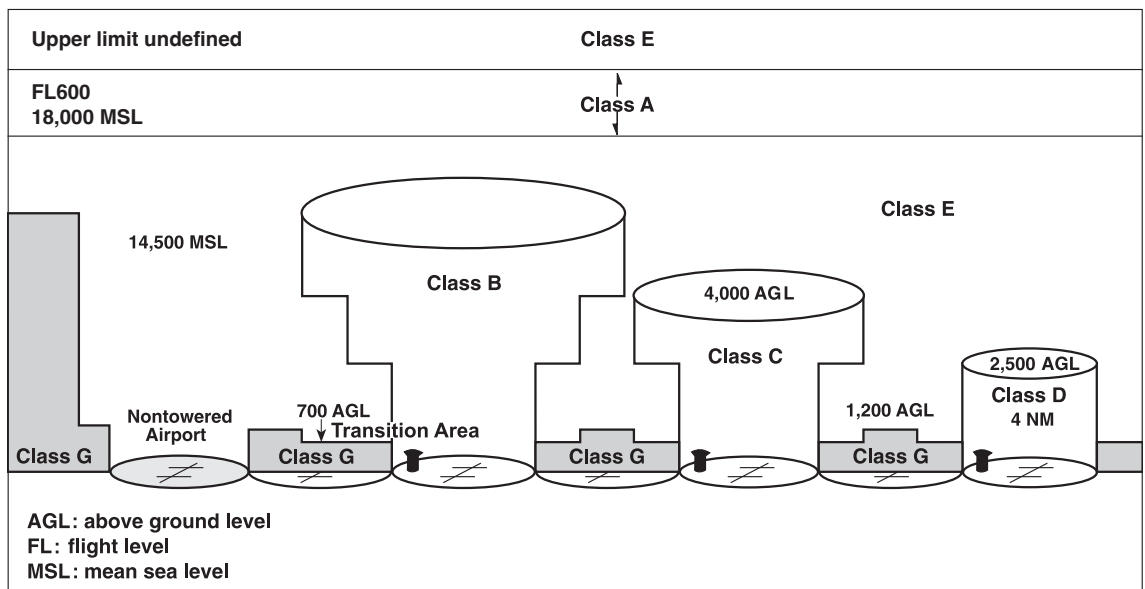

Figure 7-1. Airspace

Page Number	Question Number	Correct Answer	Explanation
7-5	Chapter text		The third sentence of the Class E description is changed to read: All airspace from 14,500 feet to 17,999 feet and airspace above 60,000 feet is Class E airspace.
8-18	7316		This question has been removed.
